

Sprint Execution, Simplified

AGILE FOR MODERN TECH TEAMS

INTRODUCTION

Welcome to Agile – Where Execution Meets Impact.

At AVS, execution is where strategy comes to life. Long meetings and scattered tasks slow you down in a fast-paced marketing environment. You need rhythm, structure, and visibility across every campaign and initiative.

That's where Agile comes in.

Whether you're a lead, a startup founder, or a team of creators, Agile gives you a repeatable process to plan smarter, move faster, and ship better work. This guide walks you through running sprints using the Agile method optimised for marketing teams, powered by ClickUp.

TABLE OF CONTENTS

3. What is Agile & Why It Works
4. The Sprint Framework: An Overview
5. How to Set Up a Sprint Backlog
6. Sprint Planning: Aligning as a Team
7. Estimating Sprint Points with Confidence
8. Running Effective Daily Standups
9. Sprint Review & Retrospective
10. Tips & Templates to Make It Stick

GETTING
STARTED

1 What is Agile Methodology & Why It Works

Agile methodologies apply Agile principles to creative and strategic work, breaking large efforts into smaller, manageable tasks that are delivered in short, focused sprints.

- 📦 Faster execution
- 📦 Clear ownership and progress
- 📦 Improved prioritisation
- 📦 More adaptability and feedback

Instead of endless to-do lists, you get a prioritised Sprint Backlog. Instead of silos, you get collaborative execution with visibility. And instead of burnout, you get a sustainable pace.

2 The Sprint Framework: An Overview

Our teams operate in 2-week sprints using ClickUp. Each sprint includes:

- 📦 Sprint Planning – Kick off with clear priorities
- 📦 Sprint Execution – Daily updates, focused work
- 📦 Sprint Review – Show and celebrate what's shipped
- 📦 Sprint Retrospective – Learn and improve next round

GETTING STARTED

3 How to Set Up a Product Backlog

 [watch video](#) >

Step 1: Create a Folder in ClickUp

-  Name it clearly: Product name
-  Use List or Board view

Step 2: Pull In Prioritised Work

 [watch video](#) >

-  Choose tasks from the product backlog
-  Ensure every item has:
 - A clear title
 - User Story (Description + acceptance criteria)
 - Sprint point estimate
 - Tags (e.g. "Backend", "Design")
 - Assignee(s)

Step 3: Organise by Status

 [watch video](#) >

-  Use statuses like To Do, In Progress, Review, Done.
-  Bonus: Add custom fields for story type, priority, and channel.

GETTING STARTED

4 Sprint Planning: Aligning as a Team

 [watch video](#) >

Sprint Planning ensures everyone knows:

-  What we're doing
-  Why we're doing it
-  What will it take

Steps to Run It

-  Review backlog tasks as a team
-  Clarify unknowns or blockers
-  Estimate each task (see next page)
-  Set the team's sprint capacity
-  Commit to the work (lock the Sprint Backlog)

Pro tip: If it feels too big, break it down before pulling it in.

GETTING STARTED

5 Estimating Sprint Points with Confidence

 [watch video](#) >

We use the Fibonacci sequence: 1, 2, 3, 5, 8, 13

Points	What they mean
1	Tiny, fast, no dependencies
2-3	A standard blog, email, or asset
5	Multi-step but straightforward
8	Complex, cross-functional
13	Too big – Break it down

Use team voting or discussion to align on estimates. The goal isn't perfection—it's shared understanding.

6 Running Effective Daily Standups

Keep it short & focused. Run live or sync via Slack, or directly in ClickUp comments. Format:

-  What did I do yesterday?
-  What will I do today?
-  What's blocking me?

GETTING STARTED

7. Sprint Review & Retrospective

Sprint Review

 [watch video](#) >

-  Walk through the completed sprint board
-  Celebrate wins
-  Capture quick results or previews
-  Get feedback

Retrospective

 [watch video](#) >

-  What went well?
-  What didn't?
-  What can we improve?

Use ClickUp Docs or a shared whiteboard. Keep it honest, action-focused, and blameless.

AVS Tips & Agile Templates

Sprint Backlog Template (ClickUp)

- Pre-built views: Sprint Status, Priority, Sprint Points
- Custom fields: Channel, Owner, Sprint No., Tags
- Automation: Move completed tasks to "Done"
